

- Changes
 - Lowered front of chassis down to 16in
 - Overall height down to 46in
 - Fixed error in rear chassis where it was angled inwards, which increased volume electrical has to their stuff
 - Triangulation on the bottom, front, and rear of the car has been changed
 - Roll hoop has been tightened to better fit the driver, and the front roll hoop has been angled more backwards for easier egress
- Potential Future Changes
 - Fix seat, Victor doesn't believe its size
- Notes
 - Seat dimensions need to be re-evaluated to clarify proper sizing of occupant cell and calm Victor still
